

Root-cause functional neurology
and functional medicine for
concussion recovery, neurological
conditions, and chronic illness

Impact for Our Referring Providers

- **Ongoing communication:** You stay in the loop, not out of it. Every referred patient's report of findings and progress exam updates are sent back to you directly, so you're never wondering what happened after the referral.
- **Careful stewardship of your patients' claims:** Judicious, transparent billing on every MVA/PIP case, so your patients' insurance benefits are used carefully and last as long as possible.
- **One provider, full continuity:** Dr. Savage sees every patient herself, start to finish, no hand-off to a rehab tech or associate.
- **Direct access for your patients:** Your patients can reach Dr. Savage directly by text, email, or portal message when questions come up.

When to Refer to Savage Wellness

"My patient's concussion symptoms just aren't resolving with standard care."

Refer to Savage Wellness: Dr. Savage specializes in persistent post-concussion symptoms – brain fog, dizziness, light sensitivity using brain-based rehabilitation to address what standard care hasn't resolved.

"My patient has an autoimmune or chronic illness diagnosis but still doesn't have a clear plan."

Refer to Savage Wellness: Functional medicine evaluation looks at root contributors – gut health, immune regulation, metabolic and stress physiology to build an individualized path forward.

“Our patients have consistently had great things to say about their experience and their results with Dr. Savage. I have a great deal of confidence referring patients to her. Her communication is timely and thorough, which allows us to maintain continuity of care. – Dr. Evans”

Dr. Kimber Savage

DC, DACNB, CFMC, CFN-S

Chiropractic Physician

Functional Neurology & Functional Medicine

Who We Treat

Motor Vehicle Accident & Concussion Track

- Concussion and persistent post-concussion symptoms (motor vehicle, sports, or other causes)
- Brain fog, headaches, light sensitivity, dizziness, and cognitive changes
- Balance disorders and unexplained neurological symptoms

Chronic Illness & Autoimmunity Track

- Autoimmune and complex inflammatory conditions
- Chronic fatigue, systemic symptoms, and conditions not fully explained by imaging or standard labs
- Movement disorders, including Parkinson's, tremor, and coordination/balance issues

What Your Patients Can Expect

➤ In-depth first visit

A 90-minute first visit. Full health history, neurological and physical exam, and time to actually be heard before any treatment plan is built.

➤ Individualized care plan

Every plan is built around that individual patient's findings, not a template.

➤ Clear intake process

A secure patient portal handles intake, scheduling, and all documentation, easy for patients to follow.

➤ Transparent payment

Auto insurance is billed directly for MVA-related care. For all other patients, Savage Wellness is private-pay with superbills available for reimbursement.
